

## FMT100 INSTALLATION & ACTIVATION GUIDE

### ① Device fastening

There is a double sided tape on the back of the device.

Use it to attach the device on the battery, so that the LED indicators are facing up.

### ② Connecting wires

Device wires are designed to be connected directly to the terminal fasteners of a vehicle battery.

Device wires must be directed towards the front of a car.

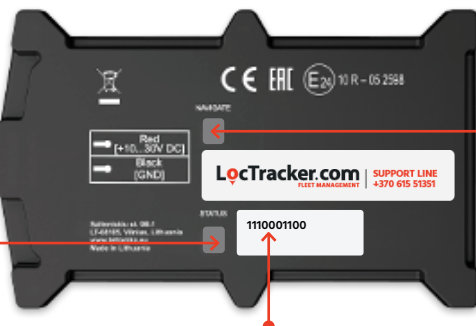

### ③ Device indicators

Power wire +  
Ground wire -

Status LED indicator:

■ Not flashing - the device is not working.

■ Is flashing - the device is working.

Note down the serial number of the device. You will find it on the white sticker on the device. You will need it in the installation step No. 6.2.

GPS LED indicator:

■ Not flashing - the device is searching for a GPS signal.

■ Is flashing - the device has detected a GPS signal.

### ④ Device installation

When both device LED indicators (Status and GPS) starts blinking - device installation is complete.

### ⑤ LocTracker account

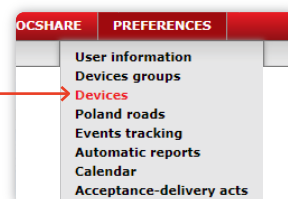

Log in to your LocTracker account.

Use your account credentials received by email.

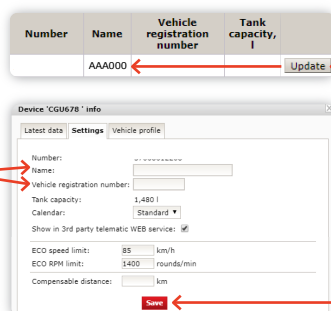

### ⑥ Device setup

6.1 In your LocTracker account go to: Preferences > Devices.

6.3 In the fields: "Name"; "Vehicle registration number" - enter plate number.

You must enter the same number in both fields.

6.2 In the column "Name" find serial number of installed device.

Press Update.

6.4 Press "Save". You can now use LocTracker system.
